

Quality is number 1 !!

Wisco Stone prides themselves on offering a **quality** natural product for a manufactured stone price.

Customers and homeowners appreciate the look, but masons have been noticing the consistency and size! Knife edges and inferior corners are a time consuming aggravation you don't find in our stone.

The way we package our caged pallets allows for complete transparency. As you can see below, every layer is visible top-to-bottom.

Our goal is for your customers and masons to see a value adding difference in our products!

We look forward to earning your business!

Cobble Choices

We have three choices of natural cobble fieldstone. All three are distinctly different and unique!

Weathered Cobbles

Full Blend Cobbles

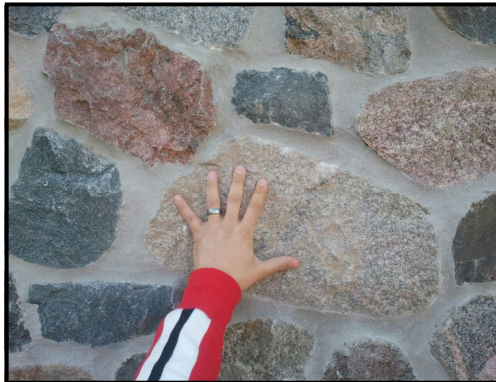

Dark Blend Cobbles

Split Face Granite

Our granite offers more dark colors like blacks, purples, greens, and vibrant reds which are very evident in our split face products.

New Looks to a Familiar Stone!

We have created new products with our fieldstone the industry has never seen!

We produce a ledge and an ashlar field-stone in both split face (seen above) and weathered cobble (seen below). These products offer a traditionally rural stone in an urban architectural look.
